

Priya Sharma

Email: priya.sharma@example.com | GitHub: github.com/priyasharma-ml

Summary

Final-year B.Tech CSE student at IIT Delhi specializing in Artificial Intelligence and Machine Learning. CGPA: 9.2/10. Passionate about building production-grade ML systems with experience in NLP, computer vision, and MLOps. 2x hackathon winner.

Technical Skills

Programming: Python, C++

ML/DL: TensorFlow, PyTorch, Scikit-Learn, Keras, XGBoost, LightGBM

NLP: HuggingFace Transformers, BERT, GPT, spaCy, NLTK, LangChain

Data: Pandas, NumPy, Matplotlib, Seaborn, SQL, Apache Spark

MLOps: Docker, Kubernetes, MLflow, FastAPI, AWS SageMaker

Tools: Git, GitHub Actions, Jupyter, Linux

Projects

Medical Image Segmentation using U-Net (PyTorch)

Built a semantic segmentation pipeline for MRI scans achieving 94% Dice score. Trained on 10,000 annotated images using transfer learning from ResNet-50. Deployed as a FastAPI microservice with Docker on AWS EC2.

Tech Stack: PyTorch, FastAPI, Docker, AWS, ResNet-50, U-Net, OpenCV, NumPy

Real-Time Sentiment Analysis Pipeline (BERT + Kafka)

Designed a real-time NLP pipeline processing 50,000 tweets/second using Apache Kafka for streaming and fine-tuned BERT for sentiment classification. Achieved 91% accuracy on financial news datasets.

Tech Stack: BERT, HuggingFace, Kafka, Python, Pandas, Scikit-Learn, SQL

Candidate Ranking System using Semantic Embeddings

Built an ATS-replacement system using sentence-transformers and pgvector for semantic similarity matching between job descriptions and resumes. Outperformed keyword-based matching by 40% in recruiter satisfaction surveys.

Tech Stack: Python, FastAPI, SentenceTransformers, PostgreSQL, pgvector, Docker

Education

B.Tech Computer Science Engineering, IIT Delhi, 2024. CGPA: 9.2/10.
